

Bringing Computation to Life

Laurie J. Heyer

L.R. King Assoc. Professor of Mathematics

Davidson College

Outline

- Computing in the Post-Genomic Era
 - Microarray Data Analysis
- “Living Hardware”
 - Computing with bacteria using principles of synthetic biology

Human Genome Project

- 3.2 billion basepairs
~ 3 gigabytes
 - human only
 - no annotation
- DNA in GenBank
~ 56,037,734,462 basepairs
- Sequence comparison
 - n^2 space
 - ~ 1 exabyte (1 million terabytes)
 - to compare two human sized genomes

Computation in the Post-Genomic Era: Microarray Experiments

1. Isolate RNA from cells
2. Fluorescently label RNA
3. Hybridize to microarray

Scanning Microarrays

2 TIFF images
x 20 MB / TIFF image

40 MB image data

One microarray =

17,000 genes

1 Red:Green ratio / gene
x 4 bytes / ratio

66 KB ratio data

One Microarray Study =

3 microarrays / patient
x 69 patients

8 GB image data
4 MB ratio data

$17,000C_2$ (= 145 million)
pairs of genes
x 4 bytes / correlation

550 MB similarity data

MicroArray Genome
Imaging and Clustering Tool

Image Analysis (Segmentation)

- Locate spot (signal) pixels
- Measure intensity of signal and background in each channel
- Compute ratio

Image Quality Assessment

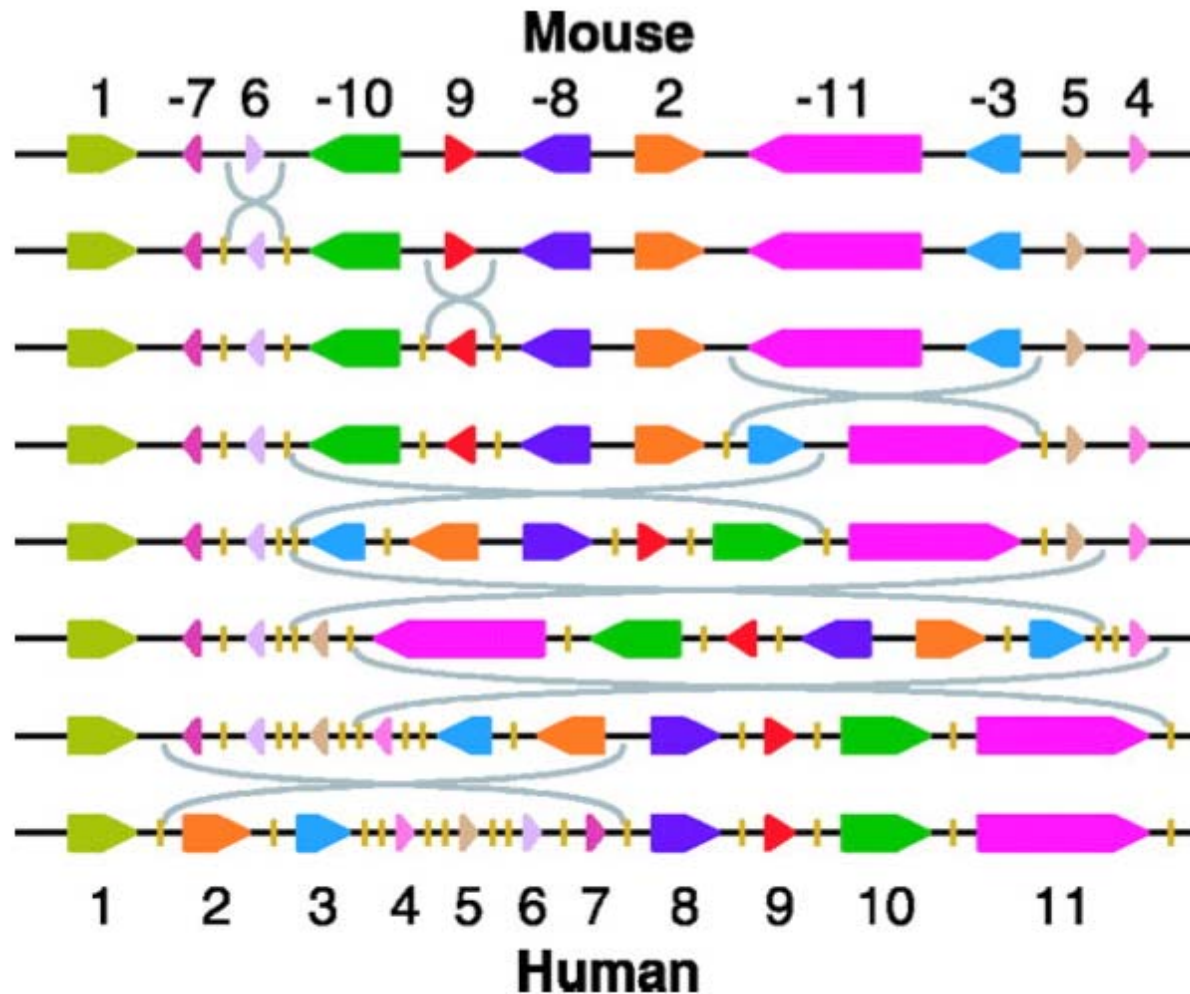

- Assess intensity-dependent effects
- Normalization methods
 - median shift
 - LOWESS

What is synthetic biology?

Genome Rearrangement

The (Original) Pancake Problem

- Given a stack of pancakes of varying sizes
- Grab some number from top of stack and invert
- Continue until stack is sorted by size (largest on bottom, smallest on top)
- What is the minimum number of flips?
- What is the worst case stack?

— Harry Dweighter, (a.k.a. Jacob Goodman), American Mathematical Monthly (1975)

The Two-Spatula Burnt Pancake Problem

Movie Recap

-2	4	-1	3
----	---	----	---

1	-4	2	3
---	----	---	---

1	-3	-2	4
---	----	----	---

1	2	3	4

Building Biological Pancakes

Two Pancake Simulations

Adjacency Matrix

P_2 : 2 Burnt Pancakes
8 vertices, each with degree 3

A	1 2	-1 2	-1 -2	1 -2	-2 -1	-2 1	2 1	2 -1
1 2	0	1	0	1	1	0	0	0
-1 2	1	0	1	0	0	1	0	0
-1 -2	0	1	0	1	0	0	1	0
1 -2	1	0	1	0	0	0	0	1
-2 -1	1	0	0	0	0	1	0	1
-2 1	0	1	0	0	1	0	1	0
2 1	0	0	1	0	0	1	0	1
2 -1	0	0	0	1	1	0	1	0

Paths of Length 3

SR₂: 2 Burnt Pancakes
8 vertices, each with degree 3

Each path taken with probability 1/27

A ³	1 2	-1 2	-1 -2	1 -2	-2 -1	-2 1	2 1	2 -1
1 2	0	7	0	7	7	0	6	0
-1 2	7	0	7	0	0	7	0	6
-1 -2	0	7	0	7	6	0	7	0
1 -2	7	0	7	0	0	6	0	7
-2 -1	7	0	6	0	0	7	0	7
-2 1	0	7	0	6	7	0	7	0
2 1	6	0	7	0	0	7	0	7
2 -1	0	6	0	7	7	0	7	0
